Claims 1-3, 5, 6, 8, 9 and 23-28 are presented for examination.

Applicants' amendment and response filed October 23, 2007 have been received and entered.

Accordingly, the rejection made under 35 USC 102(b) over Park et al. (5,750,585) as set forth in the Office action dated May 2, 2007 at page 3 is hereby withdrawn because Park et al. does not teach all the polymeric foam is high internal phase emulsion foam (HIPE) in claim 1.

Claim Objections

Claims 6, 8 and 9 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 24 and 28 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3 and 5 are again rejected under 35 U.S.C. 102(b) as being anticipated by DesMarais et al. (5,260,345) of PTO-1449, of record, for reason of record as set forth in the previous Office action dated May 2, 2007 at pages 2-3 as applied to claims 1-5.

Applicants' remarks regarding the prior art, DesMarais et al., does not teach the instant composition is used for oral administration are not persuasive since the recitation of intended use does not further limit a claim drawn to a composition.

The rejection made under 35 USC 102(b) is adhered to.

Claims 1-3 and 5 are not allowed.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 23 and 25-27 are again rejected under 35 U.S.C. 103(a) as being unpatentable over Park et al. (5,750,585) in view of Niazi (6,251,241), all of record, for reasons of record as set forth in the Office action dated May 2, 2007 at pages 3-6 as applied to claims 1-9 and 23-28.

Applicants' remarks regarding the primary reference, Park et al., does not teach the polymeric foam is high internal phase emulsion foam (HIPE) are not persuasive since the claims 23 and 27 do not recite this "critical limitation".

The instant rejection based upon the well established principle of patent law that no invention resides in combining 2 or more ingredients of known character where the results obtained are no more that the additive effects of the individual ingredients. It has not been demonstrated on the record by means of experimental data commensurate in scope with the claimed subject matter that applicants' combination produces any unobviousness or unexpected results. The mere arguments of applicants are insufficient to overcome the strong prima facie case of obviousness without the experimental data.

The rejection made under 35 USC 103 is adhered to.

Claims 23 and 25-27 are not allowed.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
